

WI-FI GUIDE

INSTALLATION

Install the module on your grill:

- First, unplug the pellet grill from A/C power
- The Wi-Fi Module is connected to the grill control with a short telco cable
- Connect one end of the telco cable to the
- Wi-Fi Module via the connector as shown below
- Connect the other end to the connector on the grill control.

WI-FI GUIDE

INSTALLATION

Mounting the Wi-Fi Module in Your Grill

STEP ONE

- The mounting location of the Wi-Fi module should be on a “cool” wall of the hopper
- The preferred location is 3” above the controller and 3” from the side
- If not already present, drill the mounting hole with a 3/8” drill bit. Deburr the hole inside and out with a round file or with a larger drill bit

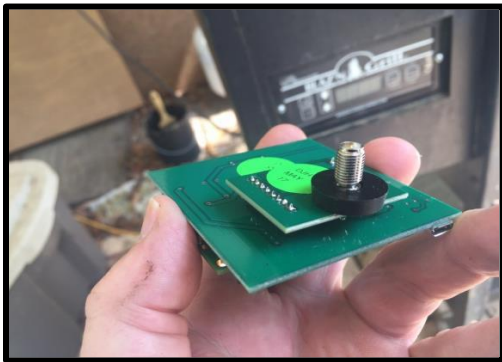

(Recommended mounting location)

WI-FI GUIDE INSTALLATION

STEP TWO

- The hardware to mount the Wi-Fi module consists of a spacer, a shoulder washer, a lock washer and mounting nut
- Place the spacer onto the Wi-Fi antennae mount

- While holding the module in place, place the shoulder washer onto the antennae mount with the shoulder of the washer fitting inside of the drilled hole

- While still holding the Wi-Fi Module in place, screw the antennae on (hand tight).
- Connect the Wi-Fi Module to the grill control with the supplied telco connector as shown previously and the installation is complete.
